

Rigger-Dogman

Initial work capacity form

Purpose of this form

This form is designed to be completed by injured workers and their supervisors and/or the return to work coordinator, if applicable;

- to determine the tasks the worker may be able to do with or without modifications, and
- to inform the medical practitioner what tasks the worker may be able to safely undertake.

The form lists a range of work tasks typically performed by a dogman-rigger where each task has been rated according to the impact on five body parts; **Green** for little or no impact, **Amber** for some impact or **Red** for significant impact.

Instructions for workers, supervisors and return to work coordinators

The injured worker and their supervisor and/or return to work coordinator, if applicable, assess the work requirements and what duties may be suitable to perform by using the following three steps:

Step 1: Tick above the coloured column of the body part(s) affected by the injury.

Step 2: To the right of each task listed, insert the letter code that represents the frequency of the task (see the frequency table on the next page for the letter codes)

Step 3: Together review the duties performed, the worker's capacity and agree on options to accommodate the injury, taking into account those duties that are coded **Red** and **Amber**.

Once these steps have been followed for each task, initial each page, complete the declaration at the back and take it to the treating doctor for consideration and approval.

Instruction for medical practitioners

- Review the proposed work accommodations documented in this form as agreed by the injured worker and their supervisor. These tasks have been evaluated by an Occupational Therapist to determine the impact on body parts when performing the duties.
- Indicate your level of support for each option; include comments where indicated and initial the relevant section. There is more space for comments on the last page of the document if required.
- Complete the "Doctor Review" section on the last page and provide a copy for the worker.
- NB:** the worker will still require a WorkCover medical certificate

Example of complete section

MARKING OUT

2. Insert Frequency of task performed (See table overleaf)

1. Tick the body part injured

Doctor to complete, and add comments

	Upper Limb (arm)	Lower Limb (leg)	Trunk / Back	Neck / Shoulder	Wrist / Hands	
Worker reads from building site plans, where to mark out	S	F	F	F	F	Doctor's Use ☐ Approve ☒ Approve subject to comments ☐ Reject (please comment) Comments: SUPERVISOR TO KEEP WATCH OF WORKER DURING THE DAY Doctor's Initials: [Signature] Proposed Modifications Ensure plans are elevated to avoid bending of leg.
Worker uses string, measuring tape and marker, measure out positioning of bricks	F	F	F	F	F	
Frequency of the task (circle one)						
Never						
Infrequently						
Occasionally						
Frequently						
Constantly						

What sort of accommodations can be made?

The supervisor and worker are well placed to consider what duties may be suitable and what accommodations could assist the return to work process. However, options need to be safe to perform and not aggravate the injury and must have confirmation of the treating doctor.

Examples of accommodations are:

- ☒ Provide assistance for certain tasks
- ☒ Reduced work hours for a short period of time
- ☒ Avoid certain tasks for a short period of time
- ☒ Modify tasks to make them easier
- ☒ Use equipment to reduce the load

Initial work capacity form

EMPLOYER: _____

EMPLOYEE: _____

NOTE: When completing the tables below, use the following table as a guide to frequency of performing a task.

	Code	Non-Material Handling	Non-Material Handling	Material Handling
Never	N	0% of an 8hr working day	No Repetitions per day	No Repetitions per day
Rarely	R	1-5% of an 8hr working day	1-2 Repetitions per day	1-2 Repetitions per day
Sometimes	S	6-33% of an 8hr working day	3-100 Repetitions per day	3-32 Repetitions per day
Frequently	F	34-66% of an 8hr working day	101-800 Repetitions per day	33-200 Repetitions per day
Constantly	C	67-100% of an 8hr work day	>800 Repetitions per day	>200 Repetitions per day

GREEN	Little impact or no impact on the body part, generally able to perform these duties
AMBER	Some impact on the body part, consider modifications to minimise exposure
RED	May have significant impact on the body part, exercise caution with these duties

USING A VEHICLE							Doctor's Use Only:	
	Frequency	Upper Limb (arm)	Lower Limb (leg)	Trunk / Back	Neck / Shoulder	Wrist / Hands	☐ Approve ☐ Approve subject to comments ☐ Reject (please comment) Comments: _____ Doctor's Initials _____ Proposed Modifications _____	
 Worker drives vehicle to / from site.								
Steering and operation of gears [if applicable]								
Operating foot controls								

DOGMAN-RIGGER							Doctor's Use Only:	
	Frequency	Upper Limb (arm)	Lower Limb (leg)	Trunk / Back	Neck / Shoulder	Wrist / Hands	☐ Approve ☐ Approve subject to comments ☐ Reject (please comment) Comments: _____ Doctor's Initials _____ Proposed Modifications _____	
     								
Worker communicates with crane driver as to when work is required.								
Worker secures loads with chain or sling to crane hook								
Worker communicates with crane driver for direction of movement and guides load								
Assists with moving materials								
Negotiating different surfaces and uneven ground								

USING HAND TOOLS		Frequency	Upper Limb	Lower Limb	Trunk / Back	Neck / Shoulder	Wrist / Hands	Doctor's Use Only: ☐ Approve ☐ Approve subject to comments ☐ Reject (please comment) Comments: _____ _____
								Doctor's Initials _____ Proposed Modifications
								
<i>Worker may be required to use hand tools weighing less than 5kg: All kinds of hand / power tools are used while adopting various postures. Some tools require a lot of grip force, balance, control, guidance and cause vibration in upper limbs [e.g. hammer, drill, grinder].</i>								
<i>Worker may be required to use hand tools weighing more than 5kg: Jack hammers [20kg plus] are used for demolition and need a lot of grip for balance and control. These tools cause extreme vibration in the upper limbs.</i>								

NB: Worker may also perform labouring duties. Please refer to the Labourer/ Construction Assistant Initial Work Capacity Form for detailed analysis.

Initial work capacity form

WORKERS & SUPERVISORS DECLARATION

We have reviewed and considered what available work can be safely and reasonably performed and what accommodations can be included. We have undertaken this in good faith and with a view to accommodating the injury and maximising the range of duties that can safely and reasonably be performed, and seeking a successful return to pre-injury duties.
